

Creating Flipcharts

Tip: Using White Ink to Create a Secret Message

White ink can be used against a white background to create secret messages or reveal the correct answers when the time is right. How do you do this? The example below shows how this is done with a matching activity.

1. While in design mode , click the connector button , and choose the diagonal line .
2. Choose white ink from the color palette. 
3. Draw white lines from each vocabulary word to the correct definition. Be sure you have a white background so that the lines you draw will not show up.
4. Save the flipchart.
5. When you use the flipchart with students, have students use a dark color to draw the lines from the vocabulary words to the definitions.
6. To check the answers, use the fill tool  to fill in the background with a color. Now the white lines will show up and you can check the student's answers against the white lines that reveal the correct answers. (See below)

** This concept can be applied to many things. For example, try using white text on a white background and using a fill color to reveal a secret message.
